

Requirements Table

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	Comments
FR-001	Functional	The system shall allow a club member to set a personal reading goal by specifying a target of number of pages or number of chapters to finish reading within a preferred time period.	Medium	Pass: The member enters a valid reading target and time period, and the system records and displays this goal. Fail: The goal is not recorded at all or it is displayed incorrectly.	Helps the club members to set a clear reading target and stay consistent with their reading.	
FR-002	Functional	The system shall allow a club member to record and view their reading progress for the current book, including the pages or chapters completed.	High	Pass: The member updates the pages or chapters they have completed and the system displays the updated progress correctly. Fail: The updated progress is not saved or it is displayed incorrectly.	Allows members to keep track of how much of the book they have completed.	
FR-003	Functional	The system shall allow club members to view and post comments in a discussions portal associated with the individual chapters of a book.	High	Pass: A member selects a chapter, views its discussion, and successfully posts a valid comment. Fail: The member cannot view the discussion or the valid comment is not posted.	Provides a platform for members to share their thoughts and discuss about individual chapters.	

FR-004	Functional	The system shall hide content inside spoiler-tagged discussion comments until the user explicitly clicks to reveal the content or marks that particular chapter containing the tagged comment as read.	High	Pass: Spoiler content remains hidden for a chapter not marked as read and is shown only after the user reveals it or marks the chapter as read. Fail: Spoiler content is visible without either action.	Prevents members from unwillingly seeing content from chapters they have not read.	
FR-005	Functional	The system shall allow club members to vote in the monthly poll for the club's next book.	High	Pass: A member selects one available book and submits a vote, and the vote is recorded in the poll. Fail: The vote is not recorded or an invalid voting attempt is accepted.	Allows members to help decide which book the club is going to read next.	
NFR-001	Nonfunctional	The system shall prevent repeat votes in monthly polls through session verification and display updated tallies in real time.	High	Pass: A member can successfully cast one vote, a second vote from the same member is rejected, and the updated tally is displayed within 5 seconds. Fail: A duplicate vote is accepted or the tally takes more than 5 seconds to update.	Maintains equality in the monthly book-selection process while providing immediate feedback.	
NFR-002	Nonfunctional	The system shall display the selected book, reading progress, and chapter discussion portal within 2 seconds under normal operating conditions.	Medium	Pass: At least 95% of tested requests display the requested page within 2 seconds under normal usage. Fail: More than 5% of tested requests exceed the 2-second limit.	Keeps the system responsive and convenient for members to use.
